Campus Wireless Connectivity
Limited coverage is present where some floors of the building have full coverage but some may have very little to no coverage.

Future coverage: Further buildings and areas are being included in wireless coverage.
Wireless network at VCU consists of approximately 2200 access points throughout both MCV and Monroe Park Campuses.

Many buildings throughout the University are setup to provide fast and reliable wireless coverage to students, faculty and staff members. VCU has deployed an industry standard 802.11 a/g/n wireless network using Cisco Systems.

This map identifies available wireless coverage in three categories of full, limited, and future coverage at various locations throughout VCU.
